👤 PROFILE

A self taught web developer with a passion for web development, I have gained experience in a variety of programming languages, including HTML, CSS, JavaScript. I am skilled in using development tools such as Git, Visual Studio Code, and debugging tools. Additionally, I have experience working with frameworks/libraries such as React and Node.js. My goal is to use my skills and experience to create visually appealing and user-friendly websites.

🎓 EDUCATION

B.C.A, *Saurashtra University* 🔗   July 2021 – present | Rajkot, India
- Relevant coursework: DSA in C, Networking, Database Management Systems, Web Development, Software Engineering

🖥 SKILLS

Programming Languages:	**Database:**	**Tools / Platform:**	**Libraries/Frameworks:**
JavaScript	• Firebase	• Linux	• React.js-Hooks-Router
	• MongoDB	• VSCode	• Redux
	• MySQL	• Git	• TailwindCSS
		• Github	• Next.js
		• Postman	• Node.js
		• Netlify	• Express.js
		• ReactDevTools	

📁 PROJECTS

Full-stack Instagram Clone,   November 2022 – present
ReactJS, Tailwind CSS, Firebase 🔗
- I recently built a full stack Instagram clone using Firebase for the backend, React for the frontend, and TailwindCSS for styling. The project includes a user authentication system, a feature for creating and viewing posts, and a system for liking and commenting on posts.
- I faced the challenge of integrating Firebase with React as I tried to use firebase V9, but was able to successfully implement real-time data updates and user authentication. Through this project, I gained experience in building full stack applications, working with Firebase, and implementing design with TailwindCSS.
- Managed global state using context API, handled Firebase queries, add dark theme, add sidebar, add update bio feature.

Full-stack Todo App (MERN),   January 2023
MongoDB, Express.js, Node.js, React.js 🔗
- Built the front-end using React and implemented features such as creating, editing, and deleting to-do items.
- Utilized MongoDB for storing and retrieving user data and to-do items and Implemented a RESTful API using Express.js for communicating with the MongoDB database, Node.js for the server-side logic and handling API routes.

YouTube Clone (Front-End Project), November 2022
ReactJs, Material UI, Youtube-API 🔗
- Developed a YouTube clone web application utilizing React and Material-UI for the front-end, and integrated the YouTube Data API to retrieve and display video information.
- Implemented features such as a search bar, video player and channel details page. implemented responsive design for optimal user experience on all devices.

🧩 INTERESTS / HOBBIES

Custom PC Building
Built my own PC Using custom components.

Tweaking android
Flashing custom ROMs, rooting.

Gaming
Casual FPS, RPG, Multiplayer PC/Mobile Gaming

DevOps
interested in learning DevOps tools like Docker, Jenkins, Ansible, Terraform, Amazon AWS and Kubernetes.
